Use your own words

Ask complex questions your way and instantly find what you need from ScienceDirect AI's underlying body of peer-reviewed, full-text articles and book chapters.

- Explain what you need, in any language.
- Get responses from deep within full-text documents, decide what to read next.
- Uncover insights easy to miss by generalist AI tools.

What researchers say about ScienceDirect AI

“ScienceDirect AI has transformed the way I work. Amidst AI tools that hallucinate or provide false information, this tool stands out for its precision.”

Professor
Portugal

“When it comes to research, integrated AI tools are the way of the future instead of third party tools (like ChatGPT).”

Librarian
UAE

“Quickly generating precise summaries and extract key findings from research papers saved me significant time and effort.”

Faculty Member
Hong Kong

Surface the knowledge you need, in less time

Save valuable research time

5 hrs 

Average time saved per week by researchers with the help of ScienceDirect AI.

Rely on trusted content

 **29%**

of citations

Nearly 3 in 10 citations worldwide lead to Elsevier journals, reflecting our commitment to quality content.

Greater coverage, stronger conclusions

14M +

Documents

Source answers from the world's largest body of peer-reviewed research.

Refined by researchers like you

30,000 +

Researchers

Built and tested in collaboration with the research community, with continuous refinements.

Frequently asked questions

[Visit ScienceDirect Support Centre ↗](#)

- Does a subscription to ScienceDirect AI include access to full-text journal articles and books?

↕
- Can I use ScienceDirect AI if I don't have access to journal articles and books through my institution?

↕
- How does ScienceDirect AI ensure data privacy and security?

↕
- Do my interactions with ScienceDirect AI get used to train Large Language Models (LLMs)?

↕
- What technology does ScienceDirect AI use?

↕
- How does ScienceDirect AI reduce the risk of hallucinations and bias?

↕
- Does ScienceDirect AI only cover content from Elsevier? If not, does it give preferential treatment to Elsevier content?
